

CAREER OBJECTIVE

Aspiring AI/ML engineer skilled in Python, Scikit-learn, LangChain, Flask, and React.js with experience building ML models, NLP pipelines, and LLM-powered applications. Passionate about developing practical AI solutions and deploying scalable intelligent systems.

EDUCATION

B.Tech, Electronics and Computer Engineering Vellore Institute of Technology, Chennai Campus	2023 - 2027
B.Tech, Electronics and Computer Engineering Vellore Institute of Technology, Chennai Campus	2023 - 2027
CGPA: 9.06/10	
Senior Secondary (XII), CBSE Ryan International School, Greater Noida	2022
Percentage: 92.60%	

PORTFOLIO

PROJECTS

DocChat– Multi-Document RAG Application

May 2026

Built a multi-document RAG pipeline using LangChain and ChromaDB that enables semantic Q&A across multiple PDFs simultaneously, retrieving the top-3 most relevant chunks per query using cosine similarity over sentence-transformer embeddings (all-MiniLM-L6-v2).

- Implemented conversation memory with a 10-message sliding window, per-document chat history isolation, and source citations showing document name and page number for every answer.
- Deployed a 6-endpoint Flask REST API supporting PDF upload, document management, single-document chat, cross-document search, 2-document comparison, and history reset– integrated with a React.js frontend.

SocialSphere– AI-Powered Social Networking App

Apr 2026

- Trained a TF-IDF + Logistic Regression sentiment classifier on 50,000 IMDB reviews achieving 88%+ accuracy (F1: 0.88), deployed via Flask REST API to automatically label social media posts as positive or negative in real time.
- Implemented real-time private messaging and instant follow notifications using Socket.io, supporting 50+ concurrent connections with sub-100ms event delivery.
- Built full-stack social platform with JWT authentication, image post feed, follow/unfollow system, and live online friends sidebar using React.js, Node.js, Express.js, and MongoDB

SKILLS

• C Programming • HTML • React • CAD • Logistic Regression • LangChain • Flask • Pandas • Data Analysis • Jupyter Notebook	• Java • CSS • Flutter • Git • Random Forest • Node.js • REST API • NumPy • MongoDB • Docker	• Python • JavaScript • Data Structures • Natural Language Processing (NLP) • Model Evaluation • Express.js • Socket.IO • Matplotlib • MySQL
--	--	--

EXTRA CURRICULAR ACTIVITIES

- Actively trade forex and cryptocurrency markets using technical and fundamental analysis.
- Was member of the web development and content team at the university's MIC Club.

ADDITIONAL DETAILS

- Secured third place nationally in Gujarat Robofest 4.0 and were awarded with 5,00,000 INR in the Underwater and Submarine category.
- Recognized for innovation in autonomous underwater robotics.
